IMPACT GLASS

Superior Protection For Your Home

We are all concerned about the safety of our families and homes.

Impact Glass provides a level of security, serenity and custom design options that otherwise cannot be realized with ordinary glass.

Specialized security glazing used in Impact glass transforms a window into a fortified line of defense. Our Impact glass passes the test for halting forced entry and is burglary resistant, it is designed to keep people and property safe for longer, there are multiple glazing options available to suit your specific needs.

STANDARD GLASS

It offers very little protection from breaking in and forced entry.

10%

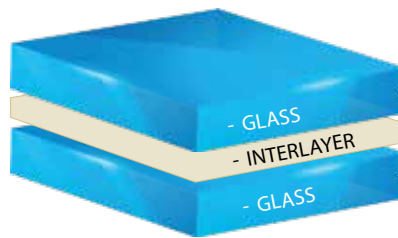

LAMINATED GLASS

Basic security glazing consists of an interlayer sandwiched between two glass layers. It offers owners the peace of mind that accidental human impact will not shatter the affected area.

50%

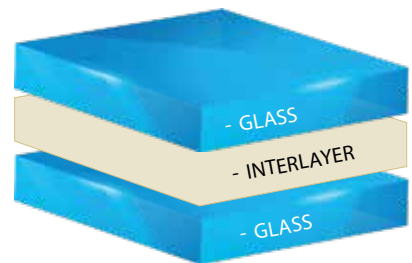

Thick interlayer with minimum 0.030 width

IMPACT GLASS

Enhanced security glazing is suitable for areas at risk of burglary. This level of risk prevention will extend deterrence to entry.

90%

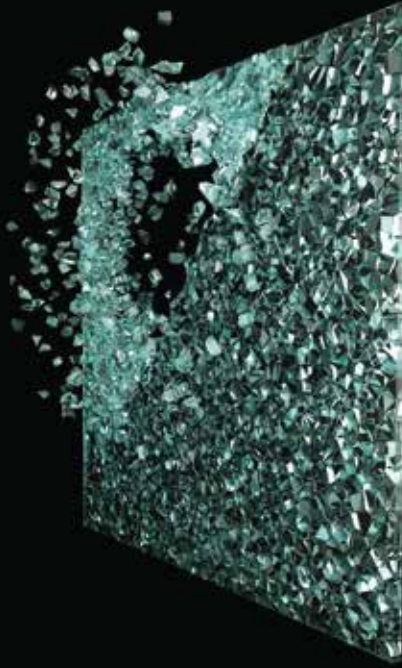

Thicker interlayer with minimum 0.060 width

Annealed Glass
Large, dangerous shards

When ordinary annealed glass breaks, the large fragments pose a threat to safety.

Tempered Glass
Small, benign pieces

Tempered glass reduces risk by resisting breakage and breaks into small, benign pieces.

Impact Glass

Impact glass does more: It's the type of safety glazing that remains intact within the window frame.
